

Our year started out with a 'splash' as we focused on our water topic, learning about where water is found on our planet and just how precious a resource it is. We considered what life would be like without a supply of safe drinking water.

We were then brought right into line with our Victorian topic - strict discipline and the 3 R's! We looked at what life was like during the 64 year reign of Queen Victoria, the major changes and inventions that occurred in this period and some of the major characters from this time. We will never forget how strict our teachers were on Victorian Day!

Going even deeper into History we moved on to investigate what life would have been like for the Ancient Greeks. We looked at their education system, their politics and hierarchical structure, the difference between the lives of the rich and poor and the legacy of the Greeks we can recognise today. We visited the ceramics café and painted our own plates with Ancient Greek designs. We wrote our own Greek Myths and Legends based on what we learnt from existing stories. Meanwhile, we studied the important relationship between the earth, moon and sun including why we have the four main seasons.

Moving closer to home we spent our last term in Year 5 learning about the history and geography of our region of Spain - Andalucía. Using maps we were able to locate places of interest and significance throughout the region. Our science centred round life-cycles of different flora and fauna - focusing on species found in our region. In art we spent time painting scenes of typical landscapes from our region using water colour, pencil and other materials.
