

Science Week

Every November EIC celebrates Science Week and this year was no exception. As is tradition, students and staff were given the challenge of the annual quiz. Some very interesting answers were submitted! The Primary section was involved in a whole host of activities and experiments, from cutting up hearts to making their own indicators and making a boiled egg squeeze through a bottle opening without cracking or breaking!! The treasure continued to be hunted and was found . . . at last!!

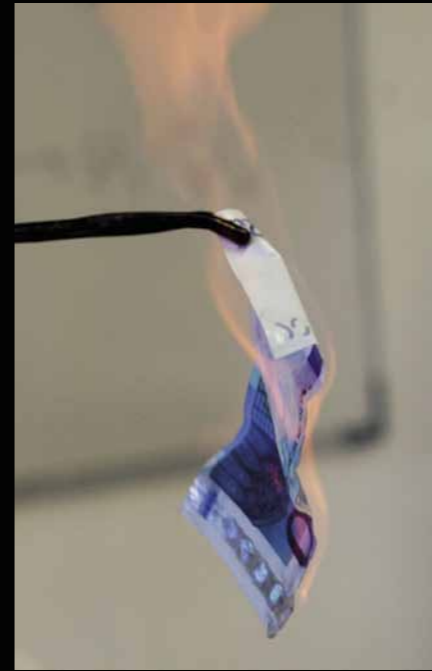

Each year group was given a House challenge, and all did extremely well building boats, bridges and lighthouses . . . a very nautical theme!

And finally the Mad Woman came out with her explosions and they do seem to be getting louder! Thank you to the Science Department staff and all the students who participated without whom a Science Week could not take place.
