

# Year 4 Work (age 8-9 years) 2005/6

*Darcy*  
 Sarah was a girl but not just any old girl, she was so beautiful people thought she was magic. She had big blue sparkling eyes, deep red delicate lips long blonde silky hair and a perfect personalitie. She was slim and very kind some people really thought she was an Angel. At the weekends and on sunny summer days she wore small pink top and a white mini-skirt. She also had bangles all up her arm and they were all the colours of the rainbow. She has loads of friends. She goes to school in Spain she is very intelligent. This is my friend Sarah.

**Run!**  
 By Jamie Elsby, Tristan Margison, Eric Morris, Bradley South and Miss Kyranne. (Class 4K).

My legs were running as fast as they could take me. I could not see where I was going. All I wanted to do was to get away. My heart was beating as fast as a race horse and I thought it was going to explode. I was breathing so rapidly I felt like I was going to faint. I had to find a hiding place before they could catch me. Bushes, nettles and thorns were scratching my bare skin and catching on my clothes. I came to a gate and quickly climbed over it. I crouched down low and curled into a ball by the hedges, hoping they would not find me. I could hear their footsteps thumping on the ground. They were getting louder and louder. It was no use, they were going to find me. What are the going to do to me?

## Alphabet Animal Poem by Class 4K

Anxious ant arriving angrily  
 Battling bulls biting beastly  
 Crazy calameres creating chaos  
 Dozy dogs dreaming distantly  
 Elastic eels eating endlessly  
 Five foxes fighting foolishly  
 Grumpy gorilla groaning greatly  
 Happy hippo helping happily  
 Insulting iguana ignoring impolitely  
 Jolly jackal jumping joyfully  
 Cuddly koala kissing kindly  
 Lazy lions leaping loudly  
 Massive monkey muttering miserably  
 Naughty nit never nipping  
 Orange otter overcoming obstacles  
 Purple parrot pottering precariously  
 Quivering quail quacking quietly  
 Rough rhino running rageously  
 Sneaky stingray stinging stealthily  
 Terrifying toro trampling toughly  
 Ugly orangutan uttering uselessly  
 Viscious vulture vying violently  
 White wolf wailing wearily  
 Excellent x-ray fish exterminating enemies  
 Yawning yaks yapping and yelling  
 Zigzagging zebras zapping zealously.

## THE MOVING statue

One day a family decided to go to the museum the history museum. When the family got to the museum there the little boy said 'let's go look at that statue' but that statue was no ordinary statue it was a funny statue!! The same moment in time the boy said 'cup back and step on his noses for the statue looked like a demon he spun his ring around and around the glass. The glass shattered and broke on the pieces he flew straight up and brash down she had no control get a good look at him his spinal was so fast My mum called 'it but he had all ready cut the power. All the buildings were on fire cars like 'under in to crums he was on top of a car the boy stepped on side to get a good look at him - he had a pair of wings sharp claws horns came out of his back and a body made of steel his dark red eyes faced him as human.

*Domia Saker*  
 You will need:  
 Flour  
 2 eggs  
 bits of chocolate  
 20 ml of water  
 Chocolate spread  
 and cream.

1. Put the water in the bowl and crack the 2 eggs.
  2. Put all the chocolate in.
  3. Give it a mix.
  4. Put in oven for 2 mins.
5. Mix chocolate spread with the  
 6. Spread on cookie and leave for

Investigation Planning Sheet on ENERGY

Name: Eliza  
 Class: 4K  
 What I want to find out: Is my marble has energy?  
 What I think will happen: My marble will roll which means it has energy.  
 My scientific question: How can I find out if a marble is round so it must roll if it is pushed or on a slope.  
 How I will do the experiment: by rolling my marble across the card which is bent.  
 How I will make a safe: by rolling the marble carefully so it does not roll off the paper onto the floor.  
 To make sure the experiment is fair, there things that are change: I must keep the marble the same size. The card must be the same height from the floor on both sides.  
 Equipment I will need to use:  
 1. Four books the same size.  
 2. One or two large card.  
 3. A piece of paper.

## Recycling

As part of our Geography topic, "Improving our Environment", Year 4 took a trip to a recycling plant in Casares. Our host, Jesus taught us a lot about the amount of rubbish that we throw away and how we can reduce, re-use and recycle it. He even showed us how to use rubbish to make homemade toys.

- We learnt a lot of interesting facts too. Here are a few examples:
- If a can of coke costs fifty cents, we only pay three cents for the coke and forty-seven for the aluminium.
  - Fleeces and shoe soles are made out of recycled plastic.
  - Milk cartons are made out of three layers; plastic, card and aluminium and recycled into crash barriers for the autopistas.

Year 4 thoroughly enjoyed the trip and shared what they had learnt in a school assembly.
